PCT/CH2004/000044

Box No. IV Text of the abstract (Continuation of item 5 of the first sheet)

For the formation of a sound insulating and absorbing cavity(8) within an engine compartment (1) said engine compartment (1) is partitioned by means of a lightweight engine compartment partitioning layer (7). Said partitioning layer (7) can be made of several sections and forms an essentially cohesive surface within the engine compartment (1). In a preferred embodiment of the invention this partitioning layer (7) consists of a carrier layer(12) and a sound absorbent layer (13) and may comprise first and second water and oil repellent layers (14,15). The cavity (8) created by this partitioning layer (7) leads to a substantive increase in transmission loss.

Form PCT/ISA/210 (continuation of first sheet (3)) (January 2004)

International Application No PCT/CH2004/000044

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 F02B77/13 B60R13/08

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

 $\begin{array}{ccc} \mbox{Minimum documentation searched} & \mbox{(classification system followed by classification symbols)} \\ \mbox{IPC 7} & \mbox{F02B} & \mbox{B60R} \\ \end{array}$

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

Category °	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
